Yes, Audiofanzine is using cookies. Since the last thing that we want is disturbing your diet with too much fat or too much sugar, you'll be glad to learn that we made them ourselves with fresh, organic and fair ingredients, and with a perfect nutritional balance. What this means is that the data we store in them is used to enhance your use of our website as well as improve your user experience on our pages (learn more). To configure your creativity, Spider® V MkII amplifiers get you there with all the ease or depth that defines your personal musical vision. Plug right in and immediately rock a traditional amp tone, or enjoy tweaking parameters until you've devised an absolutely unique and awe-inspiring sound. From the compact Spider V 240 MkII stereo combo, there's a Spider model to inspire every type of player. With a choice of more than 200 amps, cabinets, and effects to work with, your perfect tone awaits—whether you're a conventional player or a blazing iconoclast. Need to embrace your need for sonic experimentation? No problem. Spider V MkII amps provide enough options and flexibility to transform metal tones into fire-breathing dragons, clean sounds into a galaxy of ambient textures, or Brit-rock excursions into waterfalls of shimmer and chime. See all amps and effects. Completely new presets—including vintage amp presets voiced by a renowned tube-amp maker, and Artist and Iconic Song collections— deliver classic and modern sounds with all the rage, subtlety, sheen, and roar guitarists desire. Whether you seek instant gratification, or starting points for crafting your own tones, the 128 presets in Spider V MkII amps have you covered. The new Classic Speaker mode is optimal when amplifying acoustic guitars and playing along with your favorite music or onboard drum tracks. Spider V MkII amps don't just sound great with electric guitars—they also shine with acoustics. Select presets using Full-Range mode and incorporating Variax® acoustic guitars, while specially dialed-in effects such as reverb and delay further enhance the tone. Experience depth and clarity that simply isn't possible with conventional guitar amps. Spider V MkII amps are optimized for use with the optional Line 6 FBV[™] 3 Foot Controller, which enables you to control your entire rig without interrupting your performance—and may be configured to act as a traditional effects pedalboard. Most Spider V MkII amps include an onboard wireless receiver, which means all you need to do is get an optional Line 6® Relay® G10T/II transmitter* for your guitar, and you'll be unfettered and free. Get those dance moves and stage dives ready! Spider V 240 MkII, Spider V 240 MkII, and Spider V 240HC MkII amplifiers feature onboard Relay wireless receivers. Relay G10T and G10TII transmitters are sold separately. These Relay-Ready amps are also compatible with any Line 6 RF2 transmitter, such as those included with the Relay G30, G50, G55, and G90, using firmware 2.00 or higher. The Relay G10T/II is compatible with standard 1/4" output jacks used on most passive or active instruments. Instruments that have nonstandard jack wiring may require a 1/4" mono adapter for use with Relay G10TI.
